## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-14, 16-20, 39-52, 54-78 and 110-112 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding to claim 1, prior art of record taken alone or in combination fails to teach or suggest carrying the second substrate or both of the first and second substrates into a getter processing chamber in the vacuum atmosphere under the vacuum atmosphere, and subjecting to a getter processing by flashing an evaporation type getter to a surface of the second substrate at which the phosphors are disposed, thereby forming a getter film on the surface of the second substrate at which the phosphors are disposed in order to obtain an image display apparatus displaying an excellent internal atmosphere.

Regarding to claim 39, prior art of record taken alone or in combination fails to teach or suggest carrying the second substrate or both of the first and second substrates into a getter processing chamber in the vacuum atmosphere under the vacuum atmosphere, and subjecting to a getter processing by flashing an evaporation type getter to a surface of the second substrate at which the phosphors are disposed, thereby forming a getter film on the surface of the second substrate at which the phosphors are disposed in order to obtain an image display apparatus displaying an excellent internal atmosphere.

Regarding to claim 59, prior art of record taken alone or in combination fails to teach or suggest carrying the second substrate or both of the first and second substrates into a getter processing chamber in the vacuum atmosphere under the vacuum atmosphere, and subjecting to a getter processing by flashing an evaporation type getter to a surface of the second substrate at which the phosphors are disposed, thereby forming a getter film on the surface of the second substrate at which the phosphors are disposed in order to obtain an image display apparatus displaying an excellent internal atmosphere.

Regarding to claim 110, prior art of record taken alone or in combination fails to teach or suggest carrying the second substrate or both of the first and second substrates into a getter processing chamber in the vacuum atmosphere under the vacuum atmosphere, and subjecting to a getter processing by flashing an evaporation type getter to a surface of the second substrate at which the phosphors are disposed, thereby forming a getter film on the surface of the second substrate at which the phosphors are disposed in order to obtain an image display apparatus displaying an excellent internal atmosphere.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
